

PAW / TAW Outline

- 1) Historical Payment - This service type was used to document historical cost of care for a trust account. Using this Service Type will not generate a payment and it will not be picked up by any claiming calculations. At this time, the State no longer wishes for counties to use this service type.
- 2) Kinship - Waitlisted - Needs to be documented using this service type. When a change is made in the child's status the placement needs to be ended and a new placement entered identifying the correct service.
- 3) Kinship - County funded: This is identified by the service type. When a child's Kinship status changes from State funded to County funded the placement needs to be changed to reflect the new status.
- 4) Large audited rate changes:
- 5) Birthday Batch Scenario - Review handout.
- 6) Service Types Review - Review handout.
- 7) Trust Accounts – BFS
- 8) Maintain Menu reorganization.
